At a glance

About 285.7 m Population, 2025 estimate[2]	**About 17,660** GDP per capita, current international dollars (PPP), 2025[4]
5.11% GDP growth, 2025[18]	**2.70%** Current health expenditure, share of GDP, 2023[39]
31.1% Out-of-pocket share of current health expenditure, 2023[42]	**0.52** Physicians per 1,000 people, 2023[46]
1.37 Hospital beds per 1,000 people, 2023[48]	**58%** Private share of general hospitals, 2024[32]

Country background

Indonesia, with Jakarta as its capital, is a republic led by a directly elected president.[1] President Prabowo Subianto and Vice President Gibran Rakabuming Raka were sworn in on October 20, 2024, for the 2024 to 2029 term.[5]

Its population was estimated at about 285.7 million in 2025, with 59.4 percent living in urban areas and 7.5 percent aged 65 and over.[2,8,10] Life expectancy was 71.3 years in 2024, when fertility stood at 2.12 births per woman.[9,11] The economy grew 5.11 percent in 2025; the World Bank's June 2026 forecast projects 5.0 percent growth in 2026.[18,20] GDP was about 5.05 trillion current international dollars at purchasing power parity in 2025.[3]

Noncommunicable diseases cause about two-thirds of deaths, while tuberculosis incidence was 382 per 100,000 people in 2024.[12,25] A central financing risk is JKN's deficit: BPJS Kesehatan warned it could begin missing claim payments by July 2027 without government intervention.[31]

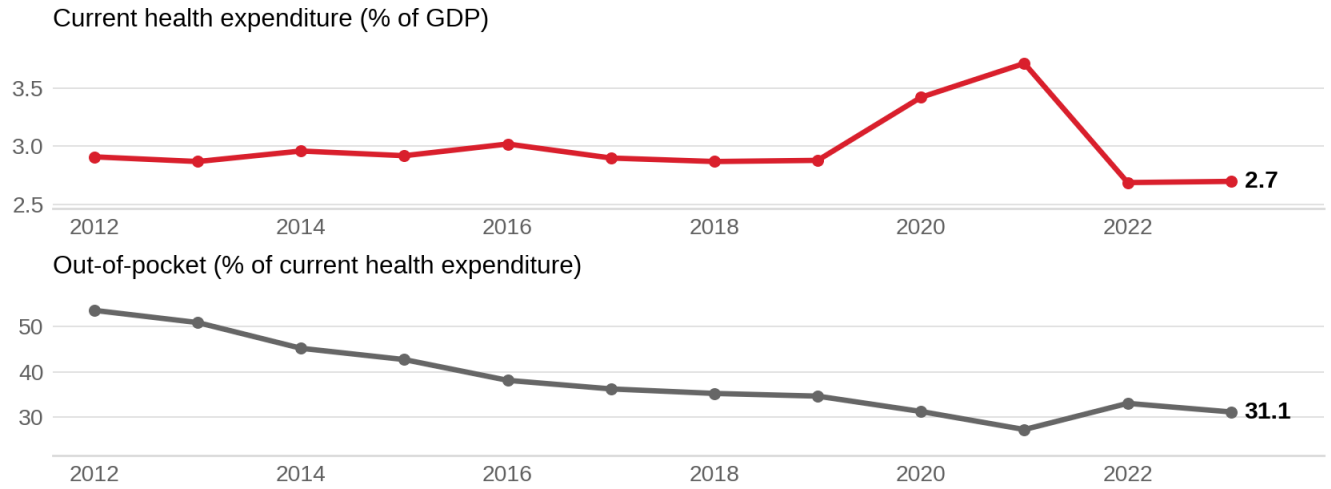

Key takeaways for CSI

- JKN covered 282.7 million people at the end of 2025, but only 81.45 percent of members were active.[30,31]
- World Bank financing is deploying 419 catheterization laboratories and is expected to upgrade 560 hospitals by 2029.[12]
- The Health Ministry projects a shortage of around 70,000 specialists through 2032, despite plans to expand domestic training.[49,50]
- Batam's planned 250-bed Mayapada-Apollo hospital targets full operations for late 2027, combining local investment with foreign expertise.[38]

Health system

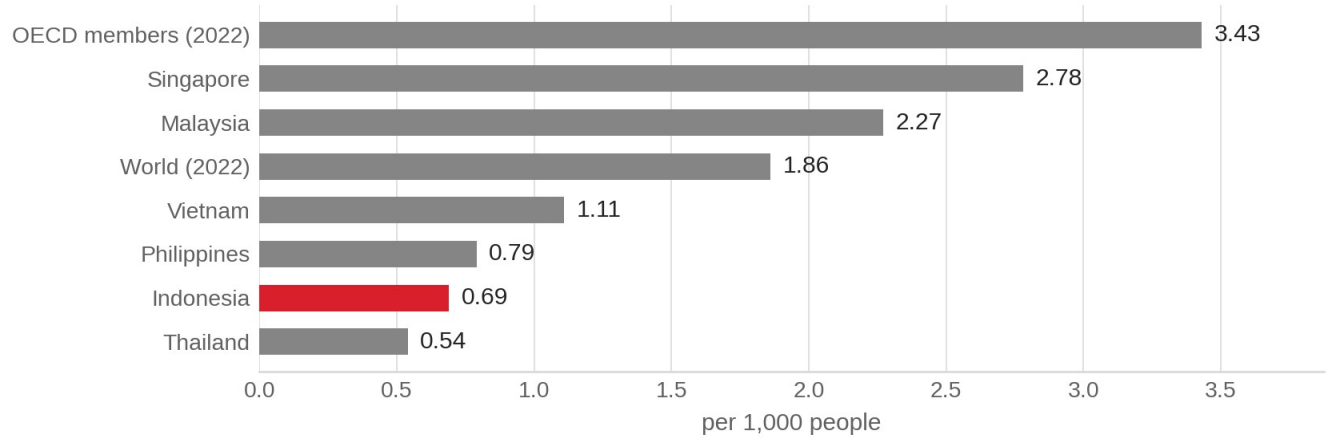

- Health service visits under JKN rose from 378 million in 2020 to 686 million in 2024, the World Bank reports.[12]
- Government financed 53.6 percent of health spending in 2023, while households paid 31.1 percent out of pocket.[41,42]
- Hospital-based specialist training prioritizes general practitioners from underserved regions; the health minister says local trainees will not pay fees.[50]

Indonesia: health spending and out-of-pocket share, 2012 to 2023

Current health expenditure is shown as a share of GDP; out-of-pocket spending is shown as a share of current health expenditure. Sources: [39,42]

Physicians per 1,000 people, Indonesia and comparators

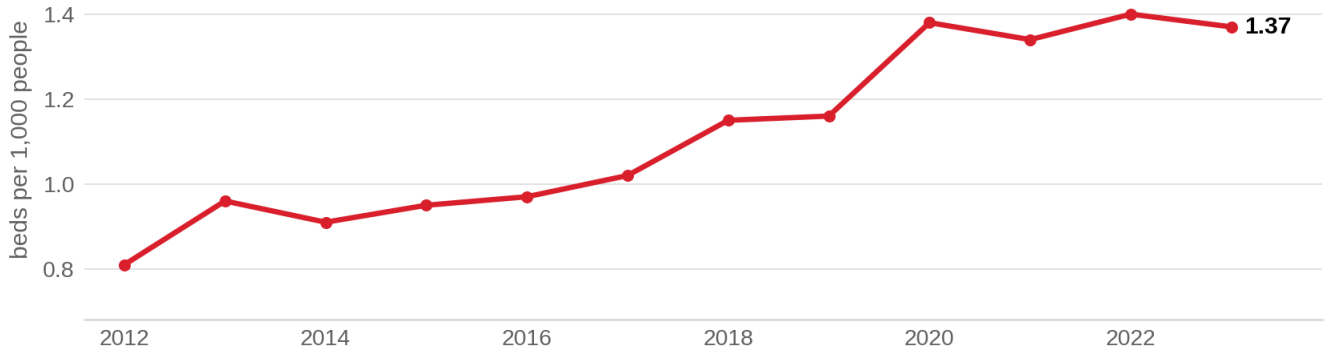

Historical World Bank cross-section: 2021 for countries and 2022 for OECD members and world aggregates. Indonesia's separately reported 2023 value is 0.52 physicians per 1,000; the chart retains the common 2021 country reference year and does not establish a comparable trend. Sources: [46]

Market and competition

- Private operators ran 1,576 of 2,710 general hospitals in 2024, and listed hospital chains continue to expand.[32,36]
- Malaysia-based A1Health owns nine Indonesian hospitals, including RS Premier facilities, adding foreign ownership to the competitive landscape.[52]
- Australia's Icon operates Bali International Hospital's cancer service, while SingHealth supports the institution as its academic partner.[53,54]

Indonesia: hospital beds per 1,000 people, 2012 to 2023

Hospital beds per 1,000 people as published in the World Bank indicator SH.MED.BEDS.ZS. Sources: [48]

Active partnerships in Indonesia

PARTNERSHIPS BY CITY

1	Medan	2
2	Bukittinggi	1
3	Greater Jakarta	13
4	Tegal / Brebes	1
5	Semarang	1
6	Surabaya	2
7	Denpasar	5

Active foreign health-system partnerships by city of the partner in Indonesia. Source: CSI partnerships tracker, verified 2026-10-07. Boundaries: Natural Earth; not an official depiction. Mapped: 22 active relationships with identified Indonesian sites. Five national or overseas-training programs are omitted. Greater Jakarta and Tegal/Brebes are grouped; one relationship may span cities. The planned Batam hospital is not shown.

Institution directory

25 foreign institutions with confirmed active partnerships (27 in all): 12 training and education, 8 clinical affiliation, 2 research collaboration, 2 advisory and consulting, 2 ownership or management, 1 government agreement. Sources in the profile and the partnerships tracker.

Institution	Nature of collaboration
Cedars-Sinai	Training and education
Harvard Medical School and Brigham and Women's Hospital (Program in Global Primary Health Care)	Research collaboration
MD Anderson Cancer Center	Advisory and consulting, Government agreement
Mayo Clinic	Clinical affiliation
St. Jude Children's Research Hospital	Training and education
Apollo Hospitals	Clinical affiliation
Asia OneHealthcare (A1Health; formerly Columbia Asia Healthcare)	Ownership or management
Chung Shan Medical University (Taiwan)	Training and education
Hong Kong Asia Medical Group (HKAMG)	Clinical affiliation
Icon Group (Icon Cancer Centre)	Ownership or management
International University of Health and Welfare (IUHW)	Training and education
Kobe University	Research collaboration
Monash Health	Training and education
Ramathibodi Hospital, Mahidol University	Training and education
Sapporo Cardiovascular Clinic	Clinical affiliation
Seoul National University Hospital	Clinical affiliation, Training and education
SingHealth	Advisory and consulting
SingHealth Duke-NUS Global Health Institute (SingHealth and Duke-NUS Medical School)	Training and education
Sun Medical Center / Sun Healthcare International	Clinical affiliation
Taipei Veterans General Hospital	Clinical affiliation
Tokushukai Medical Group	Clinical affiliation
University of Glasgow and CRUK Scotland Institute	Training and education
Wuhan Asia Heart Hospital	Training and education
Zhongda Hospital (Southeast University)	Training and education
Zhongshan Hospital (Fudan University)	Training and education

CSI position and risks

CSI partnerships in Indonesia

Opportunities for CSI

[MANUAL INPUT REQUIRED]

To be completed by CSI from internal data; not researched.

Risks and watch items

- The JKN fund recorded a Rp 17.13 trillion (US$948 million) deficit in 2025, compared with Rp 7.66 trillion (US$424 million) in 2024.[45]
- Indonesia's 2.70 percent health expenditure share of GDP in 2023 trailed Malaysia, Thailand, Vietnam and the Philippines.[43]
- Foreign-doctor licensing remained difficult in early 2025, with medical association requests for Indonesian language skills and needs-based recruitment.[7]

Recent developments

2026-08-04

Free health checks reached 73.8 million in 2026 through July 31, following about 70 million during 2025.[16]

2026-06-09

BPJS Kesehatan reported monthly deficits of about Rp 2 trillion (US$111 million) and expected a Rp 20 trillion (US$1.11 billion) government capital injection.[31]

2026-08-14

The 2027 draft health budget proposed Rp 244.9 trillion (US$13.5 billion), up 1.7 percent on the 2026 outlook of Rp 240.8 trillion (US$13.3 billion).[35]
